10	M4 x 0.7 x 16 BHCS SS		4
11	M5 x 0.8 x 10 BHCS SS		1
12	M5 SS NYLOCK		1

INSTALLATION INSTRUCTIONS

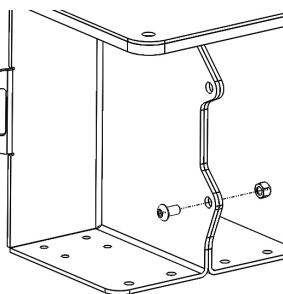

Place Loctite 246 or equivalent on the 4 M4 x 0.7 x 12 cap screws provided and screw them finger tight into the handles through the battery cradle and cover as shown.

1

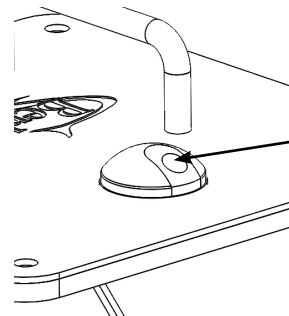

Ensure the edges of the battery cradle is running parallel with cover and tighten the 4 cap screws to 2.9 N*m

2

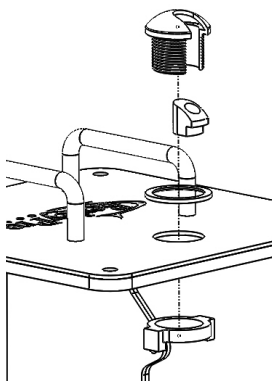

Install the M5 x 0.8 x 10 cap screw and nylock nut provided and torque to 5 N*m.

3

Choose one of the gromets provided the fits tightly around the cable or cables that you will be running through the gland.

4

Place the cable through the black nut first, then through the cover and the seal. The top half of the gland is pushed down over the gromet and the nut is then done up finger tight on the rear.

5

Finally install your batteries into the two cradles. (DO NOT TOUCH THE EXPOSED TERMINALS ONTO THE ALUMINIUM MOUNTS). and then wrap the velcro around the back of the mount and batteries.
